EXPERIENCE

PERSISTENT SYSTEMS FULL-TIME | SOFTWARE ENGINEER

sep 2021 - Present | Pune, India

FRONT-END JAVASCRIPT | REACT

- Increased website conversion rate by 20Percent through the implementation of responsive design principles, performance optimization techniques, and user-centered design strategies
- Enhanced page load time by 30percent by optimizing code, compressing images, and leveraging browser caching techniques

PROJECT(S)

IBM NETEZZA | APRIL 2022 – MAR 2023

- Developed frontend application, implemented APIs, and improved the design for seamless user experience. Successfully resolved bugs and implemented fixes to enhance overall product quality.
- Implemented Carbon Design System and leveraged Redux to create intuitive and scalable frontend solutions, enhancing user engagement and streamlining data flow within web applications.

SOURCE CODE VALIDATOR TOOL | APRIL 2023 - MAY 2023

- Developed user-friendly CSS and modals, improving the overall user experience across multiple tabs.
- Utilized React-icons and MUI data grid to enhance the front-end functionality.

MEDI-APPOINT APP | Nov - Dec2021

- The application aims to provide a platform for the patients requiring medical assistance with the respective doctors in their vicinity.
- Depending on the specialization, location and other filters, the Patients can look up for the doctor's that they would prefer and book for appointments

SWEATBUDDY | PERSONAL PROJECT

- comprehensive exercise tracking application built using the MERN stack. Designed to help you effortlessly track and monitor your workouts, Sweatbuddy provides an intuitive user interface and powerful features to enhance your fitness journey.

ACHIEVEMENTS
